### **HAUPPAUGE SCHOOLS**

#### Office of the School Nurse

## Medical and Emergency Contact Information

Dear Parent/Guardian,

Please note the following regarding health services and your student.

New York State Education Law requires all students to have a physical examination upon entering the school district for the first time, and in grades **Pre-K or K, 1, 3, 5, 7, 9, and 11.** If the cost of the exam is prohibitive, contact the school nurse's office to avail your family of any of the several scheduled examinations with the school physician during the school year.

All medication, even OTC medication such as Tylenol or Ibuprofen need parent written approval and a physician order. Enclosed find a medication authorization form. Students are not allowed to carry any type of medication. Independent students with health conditions warranting timely administration of their medication to prevent negative health outcomes if deemed independent by their private physician, parent and school nurse. Self-carry forms must be completed and filed with the health office and must be a part of the student's health care plan. Parents are advised to keep a back-up medication in school to be used in the event a student forgets. Please review this rule with your child as there are many students who have severe allergies in the school and the result of taking a medication that they are allergic to can be fatal.

If you have any concerns or questions about the health or well being of your student during the school day, please feel free to call your school nurse's office. Additionally, the enclosed forms can be downloaded from the district website.

Thank you.

# **DENTAL HEALTH INFORMATION**

#### Dear Parent/Guardian:

Good dental health habits, when formed in early childhood, will achieve lifelong benefits. Listed below are recommendations from the American Dental Association.

- Brush your teeth twice a day with fluoride toothpaste. Replace your toothbrush every three or four months, or sooner if the bristles are frayed. A worn toothbrush won't do a good job of cleaning your teeth.
- Clean between teeth daily with floss or an interdental cleaner. This helps remove plaque and food particles from between the teeth and under the gum line.
- Eat a balanced diet and limit between-meal snacks.
- Visit your dentist regularly for professional cleanings and oral exams.

Please have your family dentist complete the Dental Health Certificate and return to your child's school nurse if an examination is completed.

### **SAMPLE**

# **Dental Health Certificate- Optional**

Parent/Guardian: New York State law (Chapter 281) permits schools to request an oral health assessment at the same time a health examination is required. Your child may have a dental check-up during this school year to assess his/her fitness to attend school. Please complete Section 1 and take the form to your registered dentist or registered dental hygienist for an assessment. If your child had a dental check-up before he/she started the school, ask your dentist/dental hygienist to fill out Section 2. Return the completed form to the school's medical director or school nurse as soon as possible.

Section 1. To be completed by Parent or Guardian (Please Print)
